

RICHARD ALFONSO

Senior Full-Stack Software Engineer

W : +63 993 692 2911

M : richardalfonsodiego@gmail.com

In : linkedin.com/in/richard-alfonso-0527113a8

A : Mexico, Pampanga, Philippines

EDUCATION:

Mapúa University

2010-2014

Bachelor of Science in Computer Science

SKILLS:

Full Stack / Architecture

MERN Stack
Scalable Application
API Design and Integration
Architecture
Performance Optimization
Security Best Practices

Web Services

REST/JSON, GraphQL,
Web APIs
Amazon Web Services
(AWS)

Programming & Frameworks

JavaScript, TypeScript
React, Redux, Node.js
Next.js, NestJS
jQuery, Express.js, MongoDB
HTML5, CSS3, Sass
AngularJS, Vue.js,
Bootstrap, MySQL, AJAX
Tailwind CSS, Python, Java

PROFILE:

Senior Full Stack Engineer with 12+ years of experience building and supporting e-commerce web applications using the MERN stack. Strong in React and Next.js for fast, polished user experiences, and Node.js (Express/NestJS) for scalable backend services and RESTful APIs. Comfortable designing schemas, indexing, and optimizing queries in MongoDB and SQL-based databases. Known for improving load times and reliability through clean architecture, solid testing, and modern DevOps practices, while working smoothly with remote, cross-functional teams.

EXPERIENCE:

Full Stack Engineer

Extradom.pl | Poland | Remote
May 2020 – Jan 2026

- Took ownership of features end-to-end across React/Next.js, Node.js (Express/NestJS), and MongoDB/SQL, from initial requirements through release and support.
- Sped up key flows by improving API performance, tightening database queries/indexes, and adding practical caching (cut latency from ~800ms to ~300ms).
- Kept projects scalable by building modular services and clean UI patterns that were easy to extend without piling on tech debt.
- Worked closely with Product, Design, and QA in a fully remote setup—scoping work, breaking down tasks, and shipping on schedule.
- Integrated Stripe and PayPal payments with solid validation, webhook handling, and edge-case coverage (retries, failures, refunds).
- Built online booking + calendar features, including automated confirmations, reminders, and status updates.
- Supported deployments and scaling on AWS, improving stability through refactoring, stronger input validation, and better error handling.

Senior Frontend Developer

Lightweight Solutions | Philippines | On-Site

Nov 2016 – Mar 2020

- Led frontend work for e-commerce storefronts and dashboards using React and Next.js, owning UI delivery from start to finish.
- Built reusable components and page layouts to keep styling consistent and speed up development across new features.
- Improved page speed and Core Web Vitals by reducing bundle size, optimizing images/assets, and fine-tuning rendering behavior.
- Implemented product browsing UX (collections, search, filters, product pages) with smooth interactions and conversion-friendly layouts.
- Connected the frontend to REST APIs and handled real production states cleanly (loading, empty data, errors, edge cases).
- Raised frontend quality by introducing repeatable checks (tests where it mattered, safer PR reviews, and regression prevention).
- Worked day-to-day with design remotely to ship pixel-clean, responsive UI.
- Cleaned up and refactored older UI code to make it easier to maintain and safer to build on.

Frontend Developer

Upwork & Freelancer | Remote

Apr 2013 – Oct 2016

- Delivered frontend work for multiple client projects via Upwork and Freelancer.com, mainly on e-commerce and marketing sites.
- Built responsive interfaces using React, turning designs into clean, reusable components and consistent page layouts.
- Implemented common e-commerce UI pieces like product grids, product detail sections, carts, and account-related pages.
- Integrated UI with backend APIs and handled real-world states (slow networks, validation errors, partial data, retries).
- Focused on user-facing polish—forms, helpful error messages, empty states, and mobile-friendly interactions.
- Fixed bugs and UI regressions quickly, then cleaned up the code to avoid the same issues coming back.
- Managed remote client communication clearly (requirements, updates, timelines), and delivered work in milestones.
